

# Halloween Door Hanger

## You'll Need:

- Foam craft pumpkin
- Serrated knife
- Drill
- 6 Wood screws
- Thin black marker
- Foamboard adhesive
- Framed chalkboard
- Chalkboard marker or chalk
- Sawtooth frame hanger, a hook or velcro strips
- Assortment of Hershey Candy

## Directions:

1. Using a serrated knife, cut a foam pumpkin in half lengthwise from the stem to the bottom of the pumpkin, cutting behind the stem. You'll use the half that has the stem still attached. Using a thin black marker, draw a face with eyes and a large mouth. Carve out the face using the serrated knife.

2. Attach the carved pumpkin to a framed chalkboard using foamboard adhesive. When the glue is dry flip the chalkboard over and secure the pumpkin using 6 screws.

3. Write your message on the chalkboard using a chalkboard marker or chalk. Add your choice of Hershey Halloween candy. Make it glow with battery-operated string lights, hiding the battery box inside underneath the candy.

4. Keeping in mind the weight of the pumpkin, frame and candy, use a sawtooth frame hanger, a hook or velcro strips to hang your pumpkin from a door.
